Installing Brackets

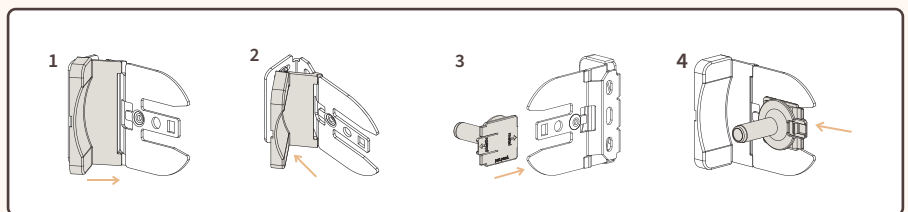

A. Inside Mount: Install brackets snug to window frame side.

B. Outside Mount: Measure total width of shade and center over the window opening. The start and end of measurement is where brackets will be installed. We recommended installing 3” above window.

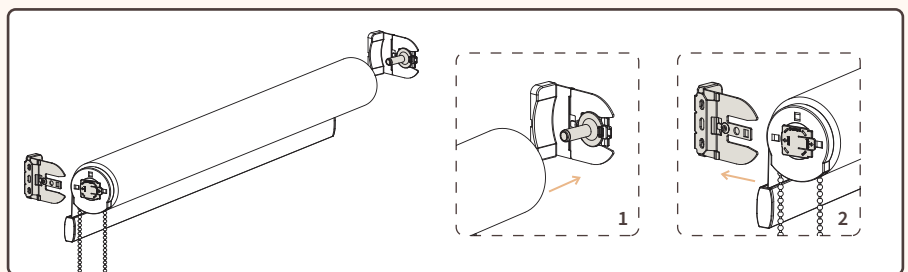

Please note that your brackets must be securely attached to the mounting surface. If the screws provided do not hit wood studs you’ll have to use a different fastener which can be found at any hardware store.

NOTE: Keep the roller shade up-rolled, do not unroll before installation.

After mounting brackets insert screw cap and bearing pin.

Installing Shade

Begin with installing bearing pin side first, once fully inserted slide in the control side until you hear a slight click.

How To Install

Decor & Ultra Brackets

WARNING

*Young children can strangle in the loop of pull cords, chains and tapes, and cords that operate window coverings.

*To avoid strangulation and entanglement, keep cords out of the reach of young children. Cords may become wrapped around a child's neck

*Do not tie cords together. Make sure cords do not twist together and form a loop.

Installing Cordless Version

Begin with installing bearing pin side first, once fully inserted slide in the side with red clip. The red clip will pop off the shade once the shade is installed. Please note the red clip should not be taken off prior to installing on to bracket.

Installing End Caps

Once successfully installed place the bracket coverings on the roller shade brackets.

Installing Brackets

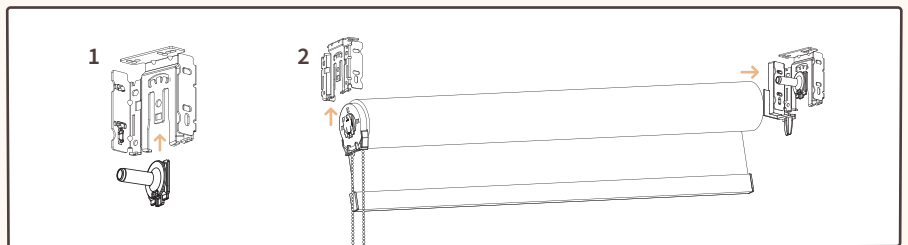

A. Inside Mount: Mount brackets snug to window frame.

B. Outside Mount: Measure total width of shade and center over the window frame. At the start and end of measurement is where brackets will sit. We recommended installing 3.25” above window opening.

Brackets must be securely attached to the mounting surface. If the screws provided do not hit wood studs you’ll have to use a different fastener which can be found at any hardware store.

NOTE: Keep the roller shade up-rolled, do not unroll before installation.

Installing Shade

Step 1-2: Before installing shade, install bearing pins to the brackets. To install shade slide bearing pin side of shade in first. Then begin to slide the chain side up in to bracket.

Installing Cordless Shade

When installing cordless version, reference the same steps on page 1. The side with the spring lock (red clip) is to be installed after the bearing side. The lock will pop off once installed. Do not remove the lock before the shade has been installed.

Installing Caps & Cover

Step 3: Complete shade by installing fascia cover then install end caps and enjoy.

Installing Brackets

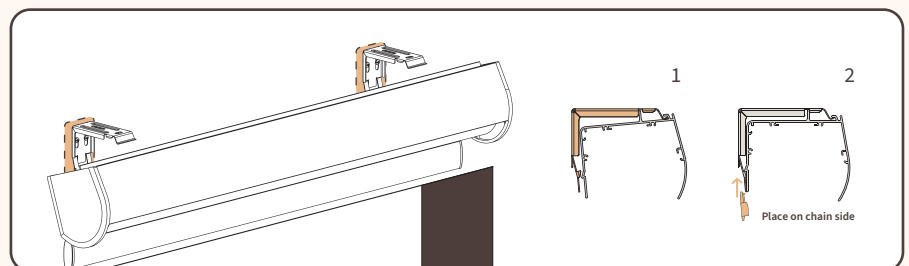

A. Inside Mount: Place brackets minimum 2" from the side frame.

B. Outside Mount: Measure the total width of shade, then center over the window frame. Place the brackets minimum of 2" in from each end. We recommend installing 3" above window frame.

Brackets must be securely attached to the mounting surface. If the screws provided do not hit wood studs you'll have to use a different fastener which can be found at any hardware store.

NOTE: Keep the roller shade up-rolled, do not unroll before installation.

Installing Shade

Begin with sliding shade in back end lowered with back end lowered enough for lip of bracket to make contact with lip on top of cassette. Once contact is made begin to lift back end up until you hear a click.

Then place stability block on chain side between mount and wall.

Installing Side channels

A. Inside Mount: Side profiles will need to slide in to hem bar before installing profiles to window frame. Use provided flat headed screws and pre-drilled holes to secure.

B. Inside Mount: Follow inside mount steps to install side profiles to profile mounts instead of window frame. Install side profile mounts first by sliding mounts up in to profile connectors, once connected use provided flat headed screws and pre-drilled holes to secure.

Installing Brackets

A. Inside Mount: Install brackets snug to window frame side.

B. Outside Mount: Measure total width of shade and center over the window opening. The start and end of measurement is where brackets will be installed. We recommended installing 5" above window.

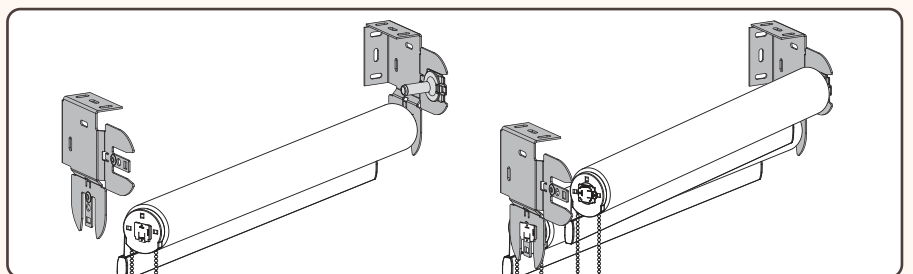

Please note that your brackets must be securely attached to the mounting surface. If the screws provided do not hit wood studs you'll have to use a different fastener which can be found at any hardware store.

NOTE: Keep the roller shade up-rolled, do not unroll before installation.

After mounting brackets insert bearing pin.

Installing Shade

Begin with installing bottom roll first, insert bearing pin side and follow with the control side. Once snapped in to place, repeat with the top roll.

How To Install

Installing Tension Bracket

Step 1: Pull tension device down to where there is very little slack. Mark the area where the bracket sits.

Step 2: When placed in the correct spot, use two screws to secure bracket.

Step 3: Place tension device on to bracket, secure with a screw and remove stopper from top hole.
